

2017 INDUSTRIAL WASTE PRETREATMENT SEMINAR

AGENDA

USEPA Update- Dental, New Guidance Documents, NACWA

Learn the latest news and updates in the Pretreatment Industry.

Conducting Effective Industrial User Site Inspections

Site inspections are essential to fully understand an industry's process and to correctly classify an industry for both approved and non-approved pretreatment programs. This talk will present guidance from the 2017 "USEPA Industrial User Inspection and Sampling Manual for POTWs", and key questions to ask several industrial user types for classification and confirmation of compliance.

Industrial User Education: Introduce, Instruct, Inspire

The Massachusetts Water Resources Authority (MWRA) has an education program for their Significant Industrial Users (SIUs) that offers educational opportunities that extend beyond the SIU's core responsibilities. This talk will share how MWRA uses annual meetings and plant tours to educate their SIUs on its Pretreatment Program's goals, challenges, and the importance of each SIU in the pretreatment program.

Industrial User Monitoring Q&A with City of Joliet and City of Crystal Lake

This Q&A session will reveal how pretreatment and laboratory staff with approved pretreatment programs tackle various aspects of monitoring industrial users and how they work and develop positive relationships with users in their program. We will generate an interactive discussion with conference attendees and encourage your questions and shared experiences.

A Deeper Look into Industrial User Permits & Violations

Determining pollutant effluent limits and the physical location where they are applied are essential steps in the discharge permitting process. This presentation will provide a detailed look into calculating and applying permit limits, determining when and where violations occur, and when USEPA criteria for significant non-compliance is triggered.

Remote Pretreatment Audits: An Interactive Discussion on Expectations and Strategies to Comply

As budgets tighten, the USEPA has been conducting fewer week-long, in-person Pretreatment Compliance Inspections (PCI) and trending more toward "Desk Audits" or PCIs conducted via telephone and email. We will present perspectives and experiences of remote audits by fellow pretreatment program managers, and conference attendees can share experiences and lessons learned.

FOG Panel: Various Perspectives and New Management Strategies on Fats, Oils, and Greases (FOG)

Speakers will share current FOG management viewpoints.
