SENIOR WATER RESOURCES PROFESSIONAL JOINS BAXTER & WOODMAN

[January 13, 2011. Crystal Lake, IL] Baxter & Woodman, Inc. Consulting Engineers is pleased to announce the addition of Mr. G. Mark Phipps, PE, CFM as Manager of the firm's Water Resources Department. Mr. Phipps earned his Bachelor of Science degree in Civil Engineering from Purdue University and is a licensed professional engineer in the states of Illinois, Indiana and Wisconsin.

Mr. Phipps earned certification from the Illinois Association for Floodplain and Stormwater Management, and routinely works with local, state and federal regulatory agencies (Federal Emergency Management Agency, US Army Corps of Engineers, Illinois Department of Natural Resources and the Illinois Environmental Protection Agency). Mr. Phipps' water resource expertise includes hydrology, hydraulics, sediment transport, water quality management, water resources regulation, master planning, construction engineering and management, public works management, and water resource protection.

Most recently Mr. Phipps served as the Chief Stormwater Engineer for the County of McHenry. "County and municipal governments are continually impacted by floodplain management. Mark's working knowledge of the numerous regulatory agencies and ordinances is a valuable resource for our clients," said Larry Thomas, Vice President and Chief Operating Officer.

Baxter & Woodman, Inc. is an employee-owned Engineering News-Record Top 500 Design Firm which provides planning, design, construction and technology services for water, wastewater, stormwater and transportation facilities for municipalities, counties and state agencies. Environmental, geographic information systems (GIS), water and wastewater operations, and advanced technology needs complement the firm's civil engineering expertise. Clients are served from nine regional offices in northern Illinois and southern Wisconsin.
